LLM-3-oy 8-Dars Report

Kutubxonalar

sft/build_sft.py - buildls the data

import json -- dict ga oxshash bolgan malumotlarni saqlayotgan, text format (dumps, loads)

import random - shuffle va random tanlash uchun

Rng - random generator number

import re - regular expressions

from collections import Counter

build_sft.py - Post training jarayonida SFT uchun training dataset tayyorlaydigan Python fayl.

Fine-Tuning - oldindan katta datasetda o'qitilgan (Pre-Trained) modelni yangi vazifa, soha yoki maqsadga moslashtirib qayta o'qitish jarayoni.

Fine - Tuning Turlari

1) SFT - Supervised Fine - Tuning
Input - Target

2) Preference Optimization
DPO, ORPO
preferred - Rejected

3) Continued Pretraining
Domain adaptation

4) RL - based Fine - Tuning
PRO, GRPO

DPO - modelni inson yoki boshqa kattaroqchi afzalliklariga moslashtirish usuli

Labelpy - LLM Post Training loyihasida model generatsiya qilgan javoblarni baholash va ularga label berish uchun ishlatiladigan fayl

generate.py loyihada modelga prompt berib, undan javoblar generatsiya qilish uchun ishlatiladigan fayl.
